My Services.

From advanced interactive courses to immersive spaces and tailored AI-assisted content, I build learning around your audience, objectives and brand.

01 · ADVANCED INTERACTIVE E-LEARNING

Courses people actually do, not just click through.

Your learners don't need more slides. They need to try, decide and see what happens. I build Storyline courses with custom JavaScript interactions that turn your content into practice, so the skills stick long after the course ends.

- Custom interactions in JavaScript and GSAP, far beyond Storyline's built-in triggers
- Scenarios, simulations and hands-on practice that mirror the real job
- Tested and LMS-ready (SCORM / xAPI) in Arabic, English or both, RTL included

WHAT YOU GET

A tested, LMS-ready SCORM / xAPI course with custom interactions, learning activities and assessments, in Arabic, English or both (RTL-ready).

STORYLINE 360 · JAVASCRIPT · GSAP · ILLUSTRATOR

02 · COURSE REVITALIZATION

Your old course, rebuilt to be worth finishing.

- A fresh visual direction that matches your brand today
- Passive click-next screens replaced with meaningful interaction
- Smoother navigation, so learners always know where they are

STORYLINE 360 · JAVASCRIPT · VISUAL DESIGN

03 · IMMERSIVE LEARNING EXPERIENCES

Learning people walk into, not scroll past.

- Guided spaces with clear paths, stations and hotspots
- Videos, quizzes and activities placed inside the space
- Opens on desktop, mobile and VR headsets

SPATIAL.IO · FRAMEVR

04 · AI-ASSISTED LEARNING CONTENT

AI speed, without the generic AI look.

- Scripts, visuals, avatars and voice-over in a fraction of the time
- Every output reviewed and refined by a person, never published raw
- One consistent look and tone across all your learning media

AI TOOLS · STORYLINE 360 · VISUAL DESIGN

05 · LEARNING VIDEOS & PRESENTATION DESIGN

Videos and decks that explain, not just decorate.

- Short explainer and intro videos with clean motion and sound
- Editable PowerPoint decks and templates your team can update
- One visual identity across video, slides and course

PREMIERE PRO · HEYGEN · POWERPOINT · ILLUSTRATOR

06 · COURSE LOCALIZATION (ARABIC & ENGLISH)

One course, two languages, both feeling native.

- Translation that reads naturally, not word for word
- Right-to-left layouts that really work, interactions included
- Voice-over recorded or regenerated and synced to the screen

STORYLINE 360 · ELEVENLABS · JAVASCRIPT

07 · INTERACTIVE WEB TOOLS & HANDOUTS

Learning that keeps working after the course ends.

- Interactive handouts, checklists, calculators and job aids
- Runs in any browser on desktop and mobile, no LMS needed
- Branded, hosted for you or delivered as a single file

JAVASCRIPT · HTML / CSS · GSAP

A simple project path.

04 Deliver

QA and handoff

04 / LIVE SIMULATIONS

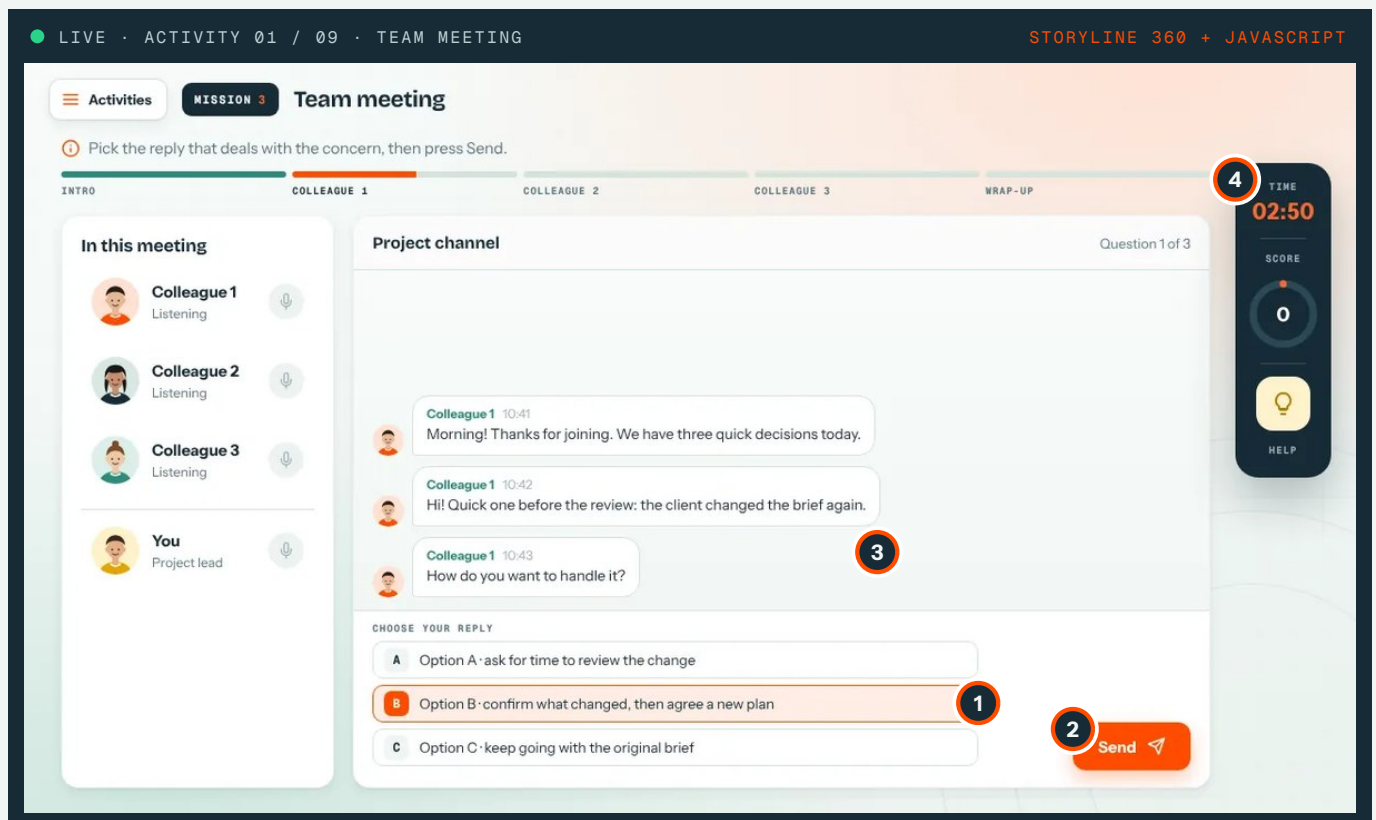

Real projects.

Try them yourself.

Nine activities rebuilt from courses I delivered for clients. Every interaction, timer and piece of feedback behaves the way it did in the course.

Client content is protected

The data is blind at the client's request.
The behavior is the real thing.

- 1 Pick the reply that answers the real concern.
- 2 Send it: send sound, then read ticks turn green.
- 3 A colleague types, then answers after a natural delay.
- 4 Timer, score ring and a hint that pauses the clock.

05 / SELECTED WORK

Learning experiences I built.

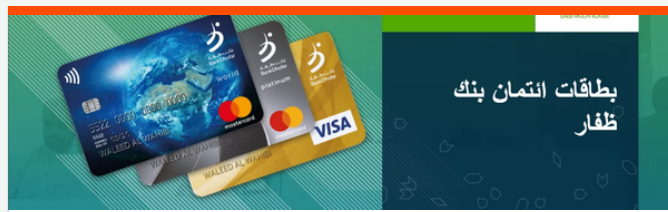

Explore interactive courses, simulations and immersive learning projects, with screenshots and live previews where available.

MHRSD [Live preview ↗](#)

Behaviors in the Workplace

Bilingual training that turns workplace regulations into interactive learning.

BANK DHOFAR [Live preview ↗](#)

Bank Dhofar E-Learning Project

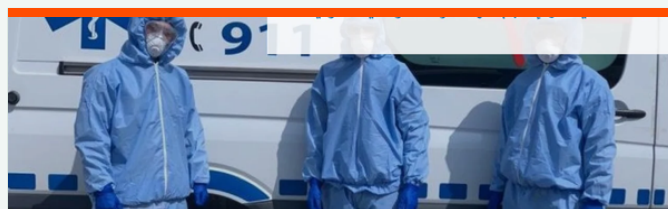

Interactive banking training with real-world scenarios and assessments.

TOGG [Live preview ↗](#)

Togg Clear Advanced Simulation

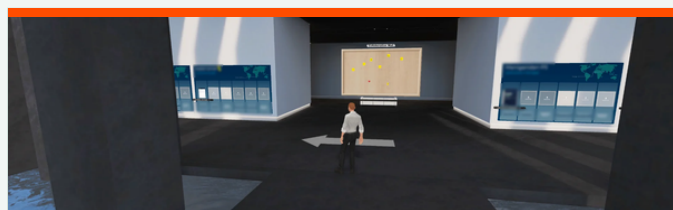

A branching coaching simulation that scores decisions, path and time.

EMPHNET [Live preview ↗](#)

Outbreak Investigation & Response

Arabic training for medical teams on responding to disasters and crises.

SMOLLAN [View project ↗](#)

Metaverse Project on Spatial.io

A virtual museum where trainees explore and submit assessment work.

INTERACTIVE KIDS BOOK [Live preview ↗](#)

Interactive Kids Book #1

Bilingual storytelling with shape games, puzzles and playful interactions.

For a tailored proposal

Share the audience, existing materials, platform and desired outcomes. A project-specific proposal can then define scope, deliverables, timeline, review rounds and investment.
